

# Ready for data sharing?

- Nobody can analyze my data as well as I can.
- Others will wrongly interpret it, and publish faster than me.
- It adds complexity to my life.
- My archive is too big.
- Others will be cited for my work.
- My subjects didn't sign for it.
- My industrial partner doesn't agree.
- Others will try to reproduce my results.
- Nobody will visit my lab to collaborate anymore.
- Others can't possibly understand what happened at the recording session.

*Send your original excuse to [r.bakker@donders.ru.nl](mailto:r.bakker@donders.ru.nl) and win something scary.*

Come to **VU University Amsterdam** on **14 December 2012**, 13:00-18:00 and hear **seven opinions**:

1. **David Kennedy** (INCF Data Sharing Taskforce)
2. **Wiro Niessen** (Medical Imaging)
3. **Jarle Brinchmann** (Astrophysics)
4. **Jelte Wicherts** (Psychology)
5. **Robert Oostenveld** (Human Connectome Project)
6. **Johan Montagnat** (NeuroLOG: System for Distributed Access)
7. **Rob Heinsbroek** (National Initiative Brain & Cognition)

*Program & free registration on [NeuroInformatics.NL](http://NeuroInformatics.NL)*
